

ENVIRONMENT – ENERGY MANAGEMENT SYSTEM POLICY

1. PURPOSE

The purpose of this policy is to ensure the protection and improvement of the environment and energy in the best possible way so that all humanity can benefit from them in the future.

2. SCOPE

This procedure applies to all employees within **GÜRPIİSAN PLASTİK SAN. TİC. LTD. ŞTİ.**

Our Environment–Energy Management System Policy includes the standards that we have established through teamwork together with all our business partners, based on our fundamental principles and values.

3. RESPONSIBILITIES

The Management Representative is responsible for the implementation of this procedure. Records arising from the implementation of this procedure are kept in the HR Department.

4. ENVIRONMENT – ENERGY MANAGEMENT SYSTEM POLICY

The Environment–Energy Policy ensures the following;

- To operate in compliance with the relevant environmental legislation and with the legal and other requirements regarding energy consumption and efficiency that we are obliged to follow,
- To ensure the continuity of our environmental understanding in order to achieve our goals and objectives with the awareness of our social responsibility, and to be an exemplary organization for the society and environment in which we operate,
- To continuously develop and improve the Environment & Energy Management Systems,
- To minimize waste, prevent pollution at its source, use energy efficiently and reduce the negative environmental and energy impacts of our activities,
- To protect the environment and sustain this principle in all our activities,
- To identify emergency risks and reduce them in order to minimize environmental risks,
- To develop our personnel and sub-suppliers by providing awareness trainings on environmental awareness, environmental management systems and efficient use of energy,
- To provide the necessary information, human resources, technology and financial resources to reduce our negative environmental impacts and to ensure efficient use of energy,

- To raise awareness and encourage our suppliers and stakeholders regarding green economy and energy efficiency practices,
- To make our company more competitive by monitoring new technologies and renewable energy sources aimed at increasing energy performance, and to use exhaustible natural resources appropriately,
- To be a reliable organization that meets the needs and expectations of customers and related parties at the highest level.

With all our policies and objectives, we commit to the continuous improvement of the environmental management system.
