

QUALITY POLICY

1. PURPOSE

The purpose of this procedure is to carry out quality and defect-free production by using the most up-to-date technology with effective resource management, and to become a preferred company in every field by creating added value for society through sustainability and innovation activities.

2. SCOPE

This procedure is applied to all employees within **GÜRPIİSAN PLASTİK SAN. TİC. LTD. ŞTİ.** Our Quality Policy includes the standards we have created together with all our business partners by carrying out our work as teamwork based on our fundamental principles and values.

3. RESPONSIBILITIES

The Management Representative is responsible for the implementation of this procedure. The records arising as a result of the implementation of this procedure are kept in the HR department.

4. QUALITY POLICY

Gürpilsan Plastik management takes **ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018** standards as a basis in all working areas. With a safe, quality and innovative service approach, our main policy towards the needs and expectations of our customers and all relevant parties is;

- To ensure that all processes are established and carried out with a risk-based approach in order to provide fast, safe, solution-oriented, timely and uninterrupted service,
- To ensure the continuity of the service provided by using resources effectively, efficiently and sustainably,
- To comply with contract conditions, regulations of national and international authorities, legal regulations and mandatory standards,
- To produce its own technology, to train qualified human resources, and to give importance to the environment and employee safety,
- To offer flexible solutions to customer expectations without compromising quality at every stage of its activities,
- To take all necessary health and safety measures so that employees can return home safely and to continuously monitor the studies carried out for this purpose,

- To care about the environment with 100% recyclable LDPE film production,
- To fulfill the requirements by disposing of our wastes through licensed companies,
- To carry out environmental projects that provide energy saving through continuous improvement and Kaizen studies and to move forward with the goal of zero waste,
- To continue our activities with projects that produce less waste and consume less energy within the scope of the design center, giving importance to the environment and occupational safety.

In this context, our company commits to continuously improve the Integrated Quality Management System at regular intervals every year with new application areas and developing technology. All our employees contribute to the successful implementation of this policy with their actions and suggestions. This policy provides a framework for regularly reviewing the company's performance and for continuously improving by monitoring, reviewing, evaluating and advancing the performance criteria defined in management activities according to the objectives.
